#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International aplication No.

PCT/KR2003/001464

I.	Basis	s of the report					
1.	With	regard to the elements of the international application:*					
ĺ	X	the international application as originally filed					
	$\exists$	the description:					
	_	pages, as originally filed					
		pages, filed with the demand pages, filed with the letter of					
	Ш	the claims:  pages, as originally filed					
		pages, as amended (together with any statment) under Article 19					
		ages, filed with the demand					
	_	pages, filed with the letter of					
	Ш	the drawings:					
		pages, as originally filed pages, filed with the demand					
		pages, filed with the letter of					
		the sequence listing part of the description:					
		pages, as originally filed					
		pages, filed with the demand pages, filed with the letter of					
	•	pages					
2.	the i	n regard to the language, all the elements marked above were available or furnished to this Authority in the language in which international application was filed, unless otherwise indicated under this item. se elements were available or furnished to this Authority in the following language which is the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).					
	$\overline{\mathbf{x}}$	the language of publication of the international application (under Rule 48.3(b)).					
		the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/ or 55.3).					
3.		With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:					
		contained in the international application in written form.					
		filed together with the international application in computer readable form.					
		furnished subsequently to this Authority in written form.					
		furnished subsequently to this Authority in computer readable form					
		The statement that the subsequently furnished written sequence listing does not go beyond the disc losure in the international applicationas as filed has been furinshed.					
		The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.					
4.	$\Box$	The amendments have resulted in the cancellation of:					
	_	the description, pages					
		the claims, Nos.					
		the drawings, sheet					
5.							
<i>J</i> .		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box(Rule 70.2(c)).**					
*	in thi	ncement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to s opinion as "originally filed." and are not annexed to this report since they do not contain amendments (Rules 70.16 0.17).					
**	Any r	eplacement sheet containing such amendments must be referred to under item I and annexed to this report.					

#### INTERNATIONAL PRELIMINARY EXAMINATION

International aplication No. PCT/KR2003/001464

l. S	Statement			
	Novelty (N)	Claims	1	YES
		Claims	NONE	NO
1	Inventive step (IS)	Claims	NONE	YES
		Claims	1	NO
]	Industrial applicability (IA)	Claims	1	YE:
		Claims	NONE	NO

The following documents identified in the International Search Report have been considered for the purpose of this report:

D1: JP 2002-059959 A
D2: KR 20-0277760 B
D3: JP 2002-127287 A

1. Novelty and Inventive Step

The invention of claim 1 is a cooking state and completion indicator of instant foods, comprising: an indicating unit combined with a cover or a sealing member of a disposal vessel for containing the instant foods, and having therein a plurality of pattern layers with various heights; a temperature-sensitive material filling the pattern layers of the indicating unit; and a message member positioned under the pattern layers.

D1 discloses a cup-noodle container. On the surface of an upper lid (2) or a side surface of said container, a time passing display body (3) which discolors in steps is printed or pasted. The time passing display body (3) is made to discolor in steps by using a temperature indicating material or temperature sensing material, so that the time passing until the completion time or the remaining period of time can be visually measured and checked.

The time passing display body (3) of D1 is equivalent to the indicating unit of claim 1 which has a plurality of pattern layers filled with a temperature-sensitive material.

(Continued on Supplemental Sheet.)

Form PCT/IPEA/409 (Box V) (July 1998)

International aplication No.

PCT/	KR20	003/00	1464
------	------	--------	------

#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

Supplemental Box (To be used when the space in any of the preceding boxes is not sufficient)

Continuation of:

Box V.

The prior art D1-D3 do not disclose any equivalent to the message member positioned under the pattern layers of claim 1. Said message member has the function to inform a message when the intended time or temperature is reached. However, the adoption of a message member as an indicating unit and said function of the message member is obvious to a person skilled in the art. Therefore, claim 1 satisfies PCT Article 33(2) in respect of novelty, but does not satisfy PCT Article 33(3) in respect of inventive step.

2. Industrial Applicability

The invention of claim 1 relates to a cooking container of instant foods such as instant noodles. Therefore, claim 1 possesses industrial applicability according to PCT Article 33(4).
